Before the mobility

Table A - Traineeship Programme at the Receiving Organisation/Enterprise

Planned period of the mobility: from [month/year] 22/03/2018 to [month/year] 25/05/2018

Traineeship title: Adhesive contact of patterned rubber surfaces

Number of working hours per week: 35

Detailed programme of the traineeship: The objective of the internship is to investigate adhesive contacts with elastomer surfaces patterned with statistical distributions of asperities. Contact experiments will be carried out using an already developed set-up allowing the detection of the micro-contacts formed between a smooth glass lens and a silicone surface decorated with a distribution of spherical micro-asperities. The data regarding micro-contacts size and contact pressure will be analysed in the light of theoretical contact model for rough surfaces.

Knowledge, skills and competences to be acquired by the end of the traineeship (expected Learning Outcomes): At the end of his traineeship, the student should have acquired some knowledge in tribology and contact mechanics together with new experimental skills.

Monitoring plan: The student will be supervised on a daily basis by his supervisor.

Evaluation plan: At the end of the internship, the supervisor will provide to the sending institution a letter detailing the achievements of the student.

The level of **language competence**⁸ in English_ [indicate here the main language of work] that the trainee already has or agrees to acquire by the start of the mobility period is: A1 A2 B1 B2 C1 C2 Native speaker
